NOVELTIES AND INNOVATION AT THE GRAND HOTEL SITEA

The historic **Grand Hotel Sitea** in Turin is being renewed to provide an ever-greater number of services to its guests.

Starting 1 March 2006 the hotel offers **six more deluxe double rooms**, located on the top floor of the building with a splendid view of the city, thereby bringing the number of rooms to 120.

In addition, rooms and suites all feature a **modem jack for high-speed Internet connection** and the possibility of **connecting to the Internet directly from the television set**.

For wellness lovers a 100 m² **Fitness Centre** has been installed, with free access to all guests 24 hours a day, outfitted with sophisticated, latest-generation equipment: three treadmills, an exercise bike, a specific bench for abdominals, one lat machine, one bench and free weights.

Innovations and novelties in a continuous striving for perfection.
